YOUSRY AHMED

Full-Stack Web Developer · CRM & Business Systems

6 October City, Giza, Egypt · +20 10 1377 4006 · **uosryahmed23@gmail.com**

Portfolio: protfolio-blond-five.vercel.app · GitHub: github.com/uosry23 · LinkedIn: linkedin.com/in/yousry-ahmed

Open to full-stack and CRM / business-systems roles — freelance, contract or full-time, remote or on-site.

PROFESSIONAL SUMMARY

Full-Stack Web Developer with 3+ years of experience shipping production web products for businesses across Egypt and the Gulf — from marketing sites and e-commerce stores to complete CRM and internal management systems. Strong on the client side with React and Next.js, and on the server with Node.js, Supabase/PostgreSQL and Firebase, including authentication, row-level security and realtime data flows. Models the business domain first — entities, roles, rules — and then builds the interface against it, so systems replace spreadsheets and disconnected tools instead of piling on top of them. Every project ships deployed, documented and seeded with working demo data.

CORE COMPETENCIES

Frontend — React.js, Next.js (App Router, SSR/ISR, Server Actions), TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, HTML5, CSS3, Responsive design, Framer Motion, Figma-to-code

Backend & Data — Node.js, Next.js Route Handlers, REST APIs, Supabase (PostgreSQL, Auth, Row Level Security, Realtime), Firebase, PostgreSQL, Database design & modelling, File storage, Serverless functions

Business Systems & E-commerce — CRM, ERP-style internal tools, Dashboards, Admin panels, Workflow & role management, WordPress, WooCommerce, Elementor, Product catalogue, Shipping zones, Order & payment workflows (cash, InstaPay, Stripe)

Delivery & Tooling — Git, GitHub, Vercel deployment, Vite, Third-party API integration, Performance optimisation, SEO fundamentals, Responsive & accessible UI, Remote collaboration

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Web Developer | Independent

June 2024 – Present

6 October City, Egypt · Remote · Freelance & contract

- Designed and delivered **business websites, e-commerce stores and custom management systems** (CRM, dashboards, admin panels) for clients end to end — requirements, data model, UI, testing and handover.
- Modelled the business domain first (entities, roles, rules, workflows), then built against it, so the rules live in the **database** — row-level security, triggers and indexes — not only in the interface.
- Built front ends in **React.js and Next.js** and back ends with **Node.js, Supabase and Firebase** — authentication, realtime updates, file storage and serverless APIs.
- Shipped each build with **seeded demo data, documented setup steps and the Supabase schema** in the README, then deployed to production on Vercel.
- Customised and maintained **WordPress and WooCommerce** stores — catalogue, variable-product weights, shipping zones and order workflow — plus performance and usability fixes on live sites.
- Owned client communication directly: first call, requirements, delivery, and continuous iterations after launch.

Remote Full-Stack Developer | Clicks Digitals

April 2025 – December 2025

Amman, Jordan · Remote

- Developed a **medical clinic website** with appointment booking, user authentication and role-based access to examination and consultation results.
- Built a **restaurant website** with responsive menu layouts and interactive ordering experiences.
- Worked with **React.js, Next.js and Tailwind CSS** while collaborating remotely with the team — features, code review and on-schedule delivery.

Junior Front-End Developer | Goo-Web

December 2023 – June 2024

Cairo, Egypt

- Developed responsive user interfaces for web applications using **React.js and Tailwind CSS**, from Figma designs.
- Managed application state with **Redux Toolkit** and improved usability and interface consistency across the product.
- Turned designs into reusable, accessible components and fixed layout and cross-browser issues.

SELECTED PROJECTS

Real Estate CRM *Next.js · TypeScript · Supabase (PostgreSQL, RLS)*

- Arabic RTL system for real-estate developers and marketing teams: projects and units with live availability (available / reserved / sold), **leads and sales stages, brokers, user permissions**, after-sales requests and maintenance tickets.
- Business rules enforced in the database through row-level security, with dashboards for occupancy and pipeline.

Live: realstate-phi-two.vercel.app · **Code:** github.com/uosry23/realstate

Infinity — Coworking Space Management System *Next.js · Supabase · PostgreSQL*

- Workspace operations and billing: customer records, check-in/check-out, shared areas and private rooms, bookings and active visits.
- Usage-based fee calculation, products and drinks added to customer bills, **cash and InstaPay payments**, audit trail and staff roles.

Live: workspace-demo-sigma.vercel.app · **Code:** github.com/uosry23/workspace-demo

Food Menu *Next.js · TypeScript*

- Menu and ordering web app with responsive layouts and interactive ordering flows.

Live: foodmenu-woad.vercel.app · **Code:** github.com/uosry23/foodmenu

Olivia Store *WordPress · WooCommerce*

- E-commerce store for an Egyptian honey brand: product catalogue management, variable-product weights, shipping zones and online order workflow.

Clinic Vista *TypeScript*

- Clinic management application covering patient records, scheduling and administration.
